

I was recently informed that a new Low Power FM (LPFM) service expansion could force K-LOVE Christian Radio stations off the air if enacted. (90.7 FM in Newport News, VA). If this is the case I beg you to reconsider this expansion. As a financial supporter of listener supported K-LOVE radio it is the only music station my family and I listen to as more and more radio stations continue to play music that does not meet the moral or ethical standards I am trying to foster in my family. K-LOVE is a positive influence on the local community and is listened to by hundreds of Christians in my church alone, not including the thousands of others who tune in to hear music that is safe for the family and supportive of their Christian values. It is in the public interest for K-LOVE to stay on the air in my community and in other parts of the country where there are similar stations because it provides an encouraging and invaluable service to a large number of radio listeners that cannot be found on other commercial radio stations. Again, please reconsider the affects of expanding LPFM will have on my community and other like it around the country as we could lose the only radio station we listen to regularly. Thank you for your time.

Respectfully,  
Frank A. Theising
